**LAYER AND METHOD FOR MICROBATTERY PROTECTION BY A CERAMIC-METAL
DOUBLE LAYER**

Examiner: Adam Arciero S.N. 10/574,756 Art Unit 1795 December 5, 2009

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 26-41, drawn to device comprising an anode, cathode, dielectric, and a protective layer formed of a metal or metal alloy.

Group II, claims 42-50, drawn to a method for making a device comprising an anode, cathode, dielectric, and a protective layer formed of a metal or metal alloy.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II contain the same technical feature of a protective layer formed of a metal or metal alloy coating at least in part, the anode, cathode and dielectric. JENSON et al. (US 2002/0001747 A1) teaches the technical feature of a microbattery having a protective metal layer (contact/current collector 65) covering at least in part, the anode, cathode and dielectric (Fig. 1c and pg. 5, [0133]-[0134]). There is a lack of unity *a posteriori*, since such technical features are not applicant's contribution over the prior art.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

4. A telephone call was made to Mary Grant on December 4, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
